

LWT-1[®]

Natures way to reduce odors and solids associated with Dairy Animal Waste

Application for Waste Lagoons

Application Rate for Dairy Livestock Lagoons.

LWT-1[®] is applied at the rate of 50 oz of LWT-1[®] per 10,000 gallons of lagoon water.

FOR INNIAL APPLICATIONS

Apply LWT-1[®] around the entire lagoon using a low pressure boom sprayer or similar applicator. You want low pressure and large droplet size so that all of the LWT-1[®] goes into the lagoon.

FOR THE MAINTENANCE APPLICATIONS

Divide the initial dose by 30 and apply daily or at least 3 times per week at the influent end of the lagoon. Whether you apply the maintenance dose daily or 3 times per week, the weekly dose should equal $\frac{1}{4}$ of the initial dose.

LWT-1[®]

Natures way to reduce odors and solids associated with Dairy Animal Waste

Application for Bedding, Feeding and Loafing areas of the Dry Lot

Use LWT-1 R at the rate of 1/oz. LWT-1 per gallon of clean water. Using a low pressure sprayer apply the diluted LWT-1 R solution lightly over bedding materials, feeding and loafing areas to reduce odors associated with ammonia and volatile organic compounds. This application will also make removal of all waste easier.

Repeat this application as often as necessary to keep odors and waste build up in check.
